will not be sold separately.

Models 35PX and 35APX utilize a UX-250 power tube in the last stage. There are other improvements in the r. f. circuits which still further increase the sensitivity and signal pick-up of the set. A radio dealer or radio technician will readily appreciate the type PX chassis when he sees the great amount of expense that Zenith has put into this chassis to gain additional tone quality and to eliminate, as much as possible, distortion that might creep into the set under adverse conditions.

The chassis is further provided with two binding posts for an electrical pick-up, thus permitting the user to connect his phonograph to take advantage of the wonderful tone quality of the audio end of the set. The type PX set, as it exists today, consists of three stages of radio frequency amplification, detector and three stages of audio amplification. All changes and improvements above noted have been effected without any increase in the list-prices.

Radio Commissioner O. H. Caldwell, Zone 1, Outlines Aims and Purposes of New Plan

Today the Pederal Radio Commission carries out the latest radio mandate of Congress, that the radio broadcasting wave lengths, powers and other facilities be redistributed equally among all the citizens of the Republic—that is, be divided among the States and sections of the Petton

making body, of course means the withdrawal of wave lengths from some States and communities which

With such redistribution of wave lengths and upsetting of the familiar knodocasting structure made inevitable by the "equalising" amendment of the 1928 Act of Congress, it has been the concern of the commission, while faithfully carrying out the equaliting of "proportionality" feature of the sot—to see that a high standard of radio service be restored to the standard of radio service be restored to the American public, which has suffered two years of interference and heterodynes growing out of the law's breakdown in 1928.

Had Expert Help

The best radio engineering talent is the country was accordingly consulted, and many months of study and analysis have been devoted to the problem by the Commissiones send the commission's engineering stant. The resulting plan, which because effective today, was announced in detail in September, and now, after sixty days of scrutiny by radio caperts, the plan stands without a w

Commission Defines Limited-Time Clause

A "limited-time" broadcasting station has been defined by the Radio Commission as a station which, under its license from this "commission, is permitted to operate during hours allowed daytime broadcasting stations as specified in general order No. 41, and in addition during certain time temporarily not used by the unrestricted station or stations on the same frequency. An example is the use of late

evening hours by a limited-time broadcasting station in the West after the closing of an Eastern station on the same frequency. A limited-time broadcasting station desiring to operate after sunset shall so notify the commission which will ascertain what hours the unrestricted station or stations on the same frequency, and will thereafter authorize the operation of the limited-time station accordingly, subject, however, to the right of said unrestricted station or stations to reclaim the use of such hours upon reasonable notice to the commission and to the

limited-time broadcasting station. A limited-time broadcasting station will not be permitted to operate at any time when its operation will cause heterodyne meerference with other broades stations assigned to the same free quency.

Burton Greene Named Chief Executive of Eria, inc.

Burton Greene, vice president and general manager of Electrical Research Laboratories, Inc., pioneer manufacturers of Erla radio apparatus, succeeds George A. Pearson as president of that company. He was formerly president of the C eene-Brown Manufacturing Company, Chicago power-unit manufacturers, recently merged with Electrical Research Laboratories, Inc.

Current rumors of a coming large consolidation with a number of other leading manufacturers of radio apparatus have been neither confirmed

nor denied.

Pointed Advice Given All Stations by Radio Commission's Chief Engineer, Dr. Dellinger

ENFORCEMENT TO BE RIGID

Washington, Nov. 10 .- The success of the new allocation of broadcasting stations is closely bound up with the accurate adjustment of the different stations to their assigned frequencies," said Dr. J. H. Dellinger, chief engineer of the Pederal Radio Commission, in discussing changed frequency conditions.

"There is every reason to expect," he cont'nued, "that the new allocations effective today will bring greatly increased service to the radio listeners. This is based, however, unequivocally upon the rigid adherence of each station to the frequency assigned Not only the commission but the broadcasters in general realise th's fully and it is expected that the stations will all operate on their new frequancies with accuracy.

"It has been brought to my attention that an impression has become current that the commission would allow a period of grace during which frequency variations would be toleraled. This rumor is groundless. "The new allocation was announced

two months ago. The commission secured the co-operation of the two branches of the Department of Commoroe concerned in frequency measprements to aid all stations in the adjustments to the new frequencies. The Bureau of Standards made spe- freedom to make tests on the new some changes in the allocation from

"In addition, the commission issued a general order giving all stations

> "The radio supervisors of the Department of Commerce have been instructed to make special arrangements to measure the frequencies of all radio stations on November 11 or as soon thereafter as possible. Stations which are not operating correctly on the new frequencies will not be allowed to continue on the air. The commission has issued licenses to the stations on the frequencies offeetive today, and can only advise any station to remain off the air which has not piaced itself in a position to operate on its assigned fre-

> Washington, Nov. 10. - To lessen radio interference, the Federal Radio

ratus employing damped-wave emissions. The order follows: On and after January 1, 1929, no license will be issued for the operation of any radio station (other than ship stations) having a transmitter

employing damped-wave emissions.

All such stations now operating under authority granted by the Federal Radio Commission and having transmitters employing damped-wave emissions shall discontinue such use and ahall replace such transmitters with apparatus employing continuous waves or modulated continuous wave emissions prior to January 1, 1929. Any licensee who is unable to comply with this order within the period specified because of reasons beyond his control may upon application and a proper showing to the commis-sion obtain a reasonable extension of

said period. All radio supervisors are requested to make inspections and reports where necessary, to the end that the terms of this order may be strictly complied with.

HERBERT OPERA SELECTIONS FEATURE SYLVESTRE HOUR

Theodore Webb, Barltone, Is Guest

Sololat Over WEAF A selection from Victor Herbert's opera, "The Red Mill," opens the weekly Sylvestre hour, to be broadcast through WEAF today at 12:30 o'clock. Theodore Webb, baritone, is the guest soloist on this date and will 2116 Pacific Ave., Atlantic City, M. J. sing two songs by Stuart, "In the Shade of the Sheltering Palm" and "The Bandolero." He will also be heard in "My Sword," from "The

Americas Greatest Value!

THE new Steinite Electric AC Radio is America's greatest radio value. You need only see and hear it to understand the sensational popularity which has made Steinite a famous name in radio!

The new Steinite is simple—as no other set ever has been. It is sturdy-far sturdler than others think a set need be. It is so natural in tone, and so thrilling in results that you will find a new pleasure in radio.

Cabinets of Beautiful Wood

Besides, it is beautiful! The table model is of Tanguile, most beautiful of all Philippine woods. The consoles are made of American black walnut veneers, with burl walnut overlays. All models are finished in genuine Duco to enhance and preserve the original beauty

A AM-American Mohawk Corporation

of these fine woods. The single illuminated drum dial, the wooderful new volume control, the antenna compensator and switch are all conveniently grouped within the richly finished antique brouse contcheon plate-controlled from your finger tipal A phonograph jack for reproducing records through the receiver with a magnetic pick-up is conveniently

Free Demonstration-Write or Phone!

Phone your nearest Steinite dealer for a demonstration—or go to see him. When you have seen and heard this wonder-set, and observed its sturdy, battleship construction, you will be amazed at the low prices made possible by Steinite's "one-profit manufacture" policy. Are Not Affected by Nation-Wide Allocation Shake-up In the United States

HAVE SIX CLEAR CHANNELS

Ottawa, Canada, Nov. 10,-(AP)-Radio listeners in the United States will find their favorite Canadian broadcasting stations on the same wave lengths, now that the new allocations have gone into effect in the United States.

By arrangement with the Canadian radio authorities, six channels are set saide for use by stations in the Dominion and broadcasters in this country will not be allowed to use these frequencies. They are 590, 730, 840,

910, 960 and 1030 kilocycles. Stations which will use 690 kilospoies are CFAC, Calgary; CFCN, Calgary; CJCH, Calgary; CKCO, Ottawa: CNRO, Ottawa.

Stations on 730 kilocycles are CFCF Montreal; CHYC, Montreal; CKAC. Montreal; CKOD, Vancouver; CKPC, Vancouver: CKMO, Vancouver: CHWA, Vancouver,

Stations on 840 kilocycles are CFCA, Toronto; CJBC, Toronto; CKLC, Red 1010, 1120, 1200 and 1210 kilocycles, Deer, Alberta: CNRT, Toronto Stations using 910 kilocycles are CPQC, Saskatoon: CJGC, London.

Stations on 960 kilocycles are OPCY, nels, wherever they are within Prince Edward Island; CFRB, York County, Ontario; CHWC, Regina; CJBR, Regina; CKGW, Bowmanville,

Stations on 1030 kilocylcies are CJOR, Sea Island, British Columbia: Hour Change Caused by Federal CNRV, Vancouver.

The Canadian National Railways has about a dozen studios which other stations for transmission of

NEWTON RADIO FORUM

Reallocations to Wednesday Due to the Federal realisection of air stations the Newton Coal Radio Porum will present its musical show on Wednesday evenings in the future. instead of the customary Thursday

Nelson Eddy, operatic baritons, will Wednesday night concert hour. The broadcast is still through WIP, and continues at the same time, from 9 to 10 o'clock.

Broadcasters, Attention

At a recent session of the Federal Radio Commission the following order was unanimously an-

All broadcasting stations shall announce clearly and distinctly the character of all mechanical reproductions broadcast by them, the announcement to precede each

such program item. In such announcements each phonograph record used, whatever its character, shall be described as a "phonograph record"; each plano-player selection shall be described as played by "mechanical piano-player"; every other mechanical reproduction shall be similarly described by the term generally used and understood by the public as meaning such mechanical reproduction.

Carelessness With Bulbs Costly, Says Fada Radio Company After Recent Check-up

testing an electric light bulb, the latter has become a universal custom of dealers, while the former has tention to the dire results of neglecting this simple operation.

"From reports reaching us." says Pada Radio, "it is incredibly evident that many dealers are still not testing tubes before installing them in emission or defective.

"Make sure that tubes are tested before they are installed in a radio installation is completed. When you purchase an electric working order and lights. This prac-

in a regular tube tester, which abould be a part of every radio merchant's tubes before they are put in use in your store than to answer an unnecessary complaint from a customer?

growing worse instead of better. It is an impossibility to expect all tubes to be 100 per cent perfect and the only way you will catch the bad ones is by testing them. Guesswork won't do the trick, but a tube tester will "In a recent check of complaints

received by dealers, it was found that about 75 per cent of the calls related directly to tubes that were below par for one reason or another. Many dealers have found that a free tube testing service is not only a good advertisement but also eliminates many unnecessary service calls. "Se owners should bring their tubes in for free testing every three or four months. In making installations the dealer should be sure that every tube has been tested before it is placed in the set. Some dealers even use f amail sticker, pasting it on the tub after it has been maked."

FOSDICK ON NATIONALISM

'True and False Nationalism" Topic of Clergyman This Afternoon

"True and False Nationalism" will be the subject of an address by Dr Harry Emerson Foedick during the National Religious Service to be broadcast through WJZ under the auspices of the Federal Council of

All Philadelphia Radio Stations Change Waves

mission, effective today,

Stations WJZ and WEAP, virtually "local" for most Philadelphians, are also affected.

All the stations just mentioned are listed below according to kilosycle frequencies (wave lengths) beginning with the longest wave stations first. HOME-MADE SET IS PASSE send the list because, under the new allocations, these stations now operate on a frequency of 560 kilocycles (a wave length of 535.6 meters), which is, incidentally, the next to the longest wave in the entire broadcast band.

If the dials on your receiver are numbered from 1 to 100 and if WFI and WLIT come in on your set very close to the 100 mark, then Stations WIP and WPAN will come in just a little below the WFI-WLTT setting. WEAF a little below that, WJZ a little below WEAF and so on down the and advertising counselor for the list, in the order in which they are here-listed.

If the dials on your set are numbered from 1 to 100 and Stations pany, manufacturers of WFI and WLIT come in very close to the 1 mark, then the order in which the stations come in will range from the 1 mark upward on the dial, but still in the order in which they are here listed.

In addition to frequencies and wave lengths, both old and new, receivers. Radio sets cannot operate list here printed shows the old power in watts and the new power at standard if one of the tubes is low watte. These are the same in all cases except for Station WCAU, which has been authorized to operate on 5000 watts. It is operating on 1000 watts at present and will continue to do so until the new 5000-watt

An inspection of the list below shows that Stations WIP and WPAN light bulb the clerk tests it for you which share time on the same wave, 401.5 meters, will now operate on the old wave formerly used by Station WEAP. That is, WIP and WFAN will now come in on your set where you formerly got WEAF.

And Station WEAF is now operating on 454.3 meters, the wave which WJZ formerly operated. So WEAP will now come in on your se at the dial settings on which you formerly got WJZ, Station WJZ will that time would serve well as antiques now be found several points below its former dial settings.

Note that Station WIAD has changed its call letters to WELK. This Ontario; CJHS, Saskatoon; CNRS, sion has restricted the power of it before installation in a receiving change will not be made formally until Tuesday night, but the station United States stations on these chan- set or selling it across the counter, will operate as WELE beginning tomorrow. Station WIBO, Elkins Park, will operate on its new wave, 322.4 meters,

only during the period 6 A. M. to 6 P. M. Station WCAU will operate full time on its cleared channel of 256

Station WCAM is assigned 234.2 moters, but shares time with several West Jersey stations.

Stations WNAT. WPED and WARY WILL will also Stations WOO. WHBW. WALK and

Necessary With Present-Day Cabinete

"Simplicity of operation is the feature of the up-to-date radio that ! by the lovers of radio broadcasting," according to the belief Harry Boyd Brown, merchandising Philadelphia Storage Battery Com-Phileo Neutrodyne-plus radio set. "Only a few years ago," Mr. Brown elaborated, "radio was an idea of un-

known value, and it was accepted with a great deal of skepticism on the part of the public. "This was immediately followed with a rush on the part of individuals to ones in their neighborhood or to New York or San Francisco, regard-

less of the type of set that was used as long as the soal was attained. "The radio sets that were used at today, radio set manufacture has progressed so rapidly. There was a mase of wire, odd but pretentious. looking parts, knobs, dials said whatstand the radio set graced.

"And from that as the starting point the magic parts flooded over the entire room, on to the roof and into

"Then the cruse for home-made and in its place came a desire to obtain just the opposite and attractive to the eya. Btill late with the advent of the all-electri set, radio really came into its own."

ARMISTICE PROGRAM

Peerless Reproducers Have Medley of Gid War Sange
